I think that would work. I agree moving the fish seems like a significant task.

I would like to see a working hood in the main lab area and perhaps movement of the evidence office across the hall.

What would you think about Jim moving out of his office, letting Epi and Imm have that space for their refrigerators and the room behind it with F&D for their ed materials? The trade off would be getting Umass to make him an office across the hall, take out the lab tables, equipment etc. in room N247 and replacing them with shelves for storage? I am not confident that Umass will agree to move the fish so I think we need an alternate plan.

Hi Julie,

Mary Conant Deputy Director of Immunization is coming to the lab today. She is checking on the relocation of Epidemiology and Immunization to our

rooms. Is there anything I should discuss with her or should I tell her to contact you?

I am coming to the Boston lab on Wednesday 2/11 around 10:00 to drop off and pick up samples. See you then.

Jim
